### **Industrial visit**

Industrial visits are arranged by colleges for their respective students with an objective of providing them an opportunity to explore industry. Objectives of industrial visit is to provide students an insight regarding internal working of companies. As theoretical knowledge is not enough for making a good professional career. With an aim to go beyond academics, industrial visit provides student a practical perspective on the world of work. The interaction with the employees there will help learn the industrial functions and business concepts from their perspective. You will be exposed to the challenges an organization face in order to survive in the corporate world. You could come up with your own strategies to overcome such challenges. Students can observe and learn as to how theatrical concepts are put to into action, thereby aiding their practical learning. Students are exposed to real working environment and shown how things are done in an organization. Industry-based learning focuses on developing analytical thinking along with the problem-solving skills of an individual. In an 'industry in classroom approach,' students are given real-life situational projects to work.
