REPORT

This report outlines the Advanced Manufacturing & COVID with a special focus on (BAKERY LEVEL II), conducted for final year students. The purpose of this training was to enhance the knowledge and skills of bakery staff in food safety practices, ensuring the production of safe and high-quality baked goods. The training covered various aspects of food safety, including hygiene, cross-contamination prevention, temperature control, and record-keeping.

In today's competitive bakery industry, ensuring food safety is paramount. Foodborne illnesses can have severe consequences for both customers and the reputation of the bakery. Therefore, it is essential to have a well-trained person who can oversee and implement food safety protocols.

The primary objectives of the Training were as follows:

1. To educate bakery staff about the importance of food safety.
2. To provide comprehensive knowledge about foodborne hazards and risk mitigation.
3. To train on proper food handling, storage, and preparation techniques.
4. To ensure compliance with relevant food safety regulations.
5. To enhance the bakery's overall food safety culture.

The training was conducted through a combination of presentations, discussions, and hands-on exercises. Interactive sessions allowed students to ask questions and clarify doubts, promoting a better understanding of the material.

Participants were assessed through a written examination at the end of the training. To pass, they had to score at least 50%. Successful participants received a Certification, which was valid for three years.

Feedback from students was overwhelmingly positive. Many commented on how the training improved their knowledge and confidence in practicing food safety. Suggestions for future training included more frequent refresher courses and additional hands-on exercises.

The Training at the bakery level was successful in achieving its objectives. It has equipped bakery staff with essential knowledge and skills to maintain a safe and hygienic environment, reducing the risk of foodborne illnesses and ensuring compliance with food safety regulations.
